Introduction

In late fall each year, the members of the American Graded Stakes Committee meet to review the country's most prestigious races and assign grades for the coming year. The system rewards the races that have consistently attracted the highest quality participants. For 2009, the committee awarded the highest status, grade I, to 115 races, with 158 races being designated as grade II, and another 216 as grade III.

Modeled after the Pattern Race system that began in Europe in 1972, the grading of races began under the auspices of the

Thoroughbred Owners and Breeders Association in 1973. Both systems help identify the best races, so breeders can identify the best racing and breeding stock.

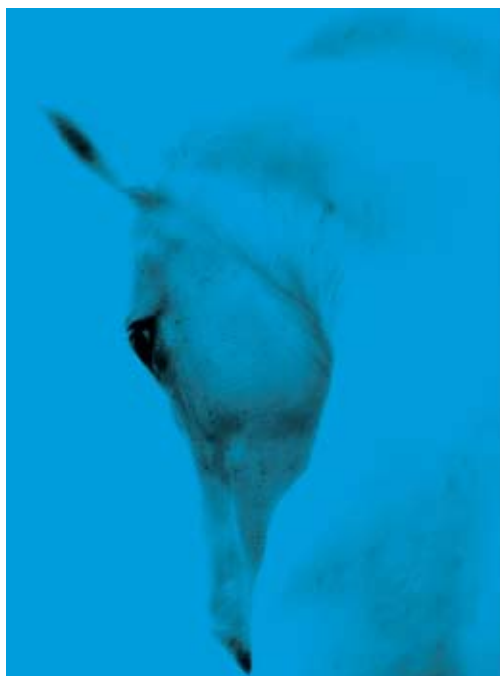

Dates of graded stakes released so far by racetracks are listed, with other dates to be added throughout the year as more stakes schedules are set. This valuable index, sponsored by **Kesmarc**, **Kesmarc Florida**, and **Equine Oxygen Therapy**, will be updated during the year and posted online at BloodHorse.com for easy reference.
