

## STALLION DURABILITY: PERCENTAGE OF FOALS THAT GET TO THE RACES

- Stallions that stand or stood in North America
- Statistics include racing in Northern Hemisphere (excludes Japan)
- Stallions whose first crop was foaled in 1995 or later, who have at least three crops of foals 3 years old or older, and who have at least 100 foals of racing age
- Current 2-year-olds are excluded from all statistics
- Stallions with identifiable stud fees as of 2005 or later (even if now deceased or pensioned, a stallion that stood in 2005 likely will have yearlings of 2007)
- Stallions with a lifetime percentage of at least 70% starters from foals (the national average fluctuates around 70% annually)

Stallion	Stud fee	Sire	BMS	Fis RA	Strtrs	% Starters/ Foals RA	Avg. Starts per Starter

## STALLION DURABILITY: AVERAGE NUMBER OF STARTS PER STARTER

- Stallions that stand or stood in North America
- Stallions whose first crop was foaled in 1995 or later, who have at least three crops of foals 3 years old or older, and who have at least 100 foals of racing age
- Statistics include racing in Northern Hemisphere (excluding Japan)
- Current 2-year-olds are excluded from all statistics
- Stallions with identifiable stud fees as of 2005 or later (even if now deceased or pensioned, a stallion that stood in 2005 likely will have yearlings of 2007)
- Stallions with a lifetime average of 20 or more starts per starter (the national average fluctuates around 16 average lifetime starts per foal for recent crops)
